February 9th, 2012., Budapest

To whom it may concern

I am writing this endorse József Kollár for her ICF Credential.

Jozsef has a very strong background in knowledge transfer and he is dedicated to teach and share experience. He can see the big picture and always has useful stories which are great advantages in coaching. He has deep knowledge in philosophy, but his tips and tricks are also useful, so its a good combination of theory and practice.

I had the pleasure to observe while he was coaching me in Budapest 3 occasions. I recognised a nice evolution in coaching skills, he became more and more non-directive during several coaching seesions. He consistently demonstrated coaching competencies at ACC level.

He already has great contribution to the coaching community in Hungary and I am sure that he will have more in the near future.

I am delighted to recommend József Kollár for the International Coach Federation credential.
